Cantonese (supplemented with English terminology)

## Synopsis of the Seminar

People spend around 80% of their daily time indoors. How online map system makes things easy for people is a question. The guest speaker and his team would build up a full stack map and data services by combining location-based big data, visual maps, signal maps and digital maps to develop a smart indoor mapping system for a smarter city. The guest speaker's team would build an indoor mapping system to suit the needs of different stakeholders such as commercial, industrial, government bodies and NGOs. The positioning service system include the latest AR and VR technology. The guest speaker would also inspire on the indoor positioning idea in project management and the construction industry.

## Guest Speaker

Dr John C.Y. Chan awarded his PhD in Environmental Engineering from The Hong Kong Polytechnic University. He was a Professor of Sun Yat-Sen University and Associate Dean of Faculty of Engineering, University of Nottingham, Ningbo, China. He leads the Research & Development in Environmental issues / IoT / Logistics for more than 10 years.

Dr Chan is the Founder and the Chief Executive Officer (CEO) of Mapxus Company Ltd.
